Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the first Office Action for serial number 10/804,625, Systems and Methods For Stabilizing A Handheld Object, filed on March 19, 2004.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to apparatus, classified in class 248, subclass 351.1.
- II. Claims 7-15, drawn to methods, classified in class 396, subclass 420+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, and II are related as apparatus and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the apparatus as claimed can be practiced with another materially different apparatus or (2) the apparatus as claimed can be used in a materially different process of using that apparatus (MPEP § 806.05(h)). In the instant case, the apparatus could be used to stabilizing firearms.

During a telephone conversation with Brandon G. Williams on 9/6/05 a provisional election was made with traverse to prosecute the invention of group 1, claims 1-6. Affirmation of this election must be made by applicant in replying to this Office Action. Claims 7-15 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,752,369 to Cameron. Cameron discloses a stabilizing cord (12), an attachment device (14) wherein the handheld object (fig. 2) can be stabilized when the stabilizing cord (12) is pulled taut (fig. 1); an attachment (16); a button adapter (20) in which a cord lock (fig. 3) identifies the position where the stabilizer needs to be secured to pull taut at a proper desired position; wherein a stabilizing cord (12) is a retractable stabilizing cord (fig. 2) with a housing (fig. 3); a device storage housing (fig. 3) capable of allowing the stabilizer to be stored compactly.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 5,738,328 to O'Farrill

U.S. Patent No. 1,766,090 to Worsching

U.S. Patent No. 5,586,760 to Hauter

U.S. Patent No. 6,092,897 to Smerdon, Jr.

Art Unit: 3632

U.S. Patent No. 5,727,343 to Wehner

The above references disclose a structure similar to the applicant's invention.
